1131 S Street, Sacramento, CA 95811

## INFORMATION BULLETIN

A nationwide collaborative effort has resulted in the development and delivery of the National Traffic Incident Management (TIM) Responder Training Program. This multi-disciplinary training program, developed through the second Strategic Highway Research Program (SHRP2) is now available to all emergency responders and those supporting Traffic Incident Management Operations. This communication contains a SHARP2 information sheet and a brochure on the TIM training program. State Fire Training believes this is valuable training for first responders and highly recommends participation by the California fire service.

In addition to Four TIM 1.5 day Train-the-Trainer courses that have already occurred, two additional deliveries have been scheduled. Please click on the link below for registration information on each class.

June 9-10, 2014

[Cal Trans Office, Redding](#)

June 12-13, 2014

[Visalia Fire Department](#)

This training has been endorsed by the International Association of Fire Chiefs, the International Association of Chiefs of Police, the National Volunteer Fire Council, the Towing and Recovery Association of America and the International Association of Directors of Law Enforcement Standards and Training.

Specific questions on this training should be directed to Paul Jodin (Paul.Jodin@dot.gov) or Gummada Murthy (gmurthy@aathto.org).
